Please take note that the drum weights can vary depending on the packer.

Please take note that the products seen above can be produced to your particular specification for example, for chopped the dice can be:

For example diced tomatoes can be 19x19 to 14x14mm, can be with or without calcium added, the brix levels can vary from natural brix to 7/8.

The Passata can be produced to various brix levels, such as 6,8,10 brix and the Crushed Tomatoes can be produced to different sieve sizes.

The Pizza Sauce can be manufactured to your exact recipe in the desired brix.
